Left—Architectural concrete administration building at Washington National Airport. W. E. Reynolds, commissioner of public buildings. Louis A. Simon, supervising architect and Howard L. Cheney, consulting architect

Below—Decorative details on administration building at Jacksonville, Fla., Municipal Airport are an integral part of the architectural concrete structure designed by Jefferson D. Powell, Jacksonville architect.

A

RCHITECTURAL CONCRETE for AIRPORT BUILDINGS

economical, firesafe, designed in keeping with the spirit of aviation

Even before the war the vigorous, fast-growing air transportation industry was utilizing concrete as a combined architectural and structural medium. Since Pearl Harbor hundreds of firesafe concrete hangars, service buildings and other structures have been built to serve military aviation.

Architectural concrete will likewise provide modern, good-looking, low annual cost airport buildings for the inevitable postwar expansion of civilian aviation.

Literature on newest developments in architectural concrete construction mailed free in United States and Canada. See Sweet's Catalog, 4/33.

PORTLAND CEMENT ASSOCIATION, Dept. 2-8, 33 W. Grand Ave., Chicago 10, Ill.

A national organization to improve and extend the uses of concrete . . . through scientific research and engineering field work
